April 18th, 1995.

Dear Sir,

Rotating Equipment Engineers - Pumps and compressors-
Chemicals and Petroleum Division - Calgary.

Last week I applied for a position in response to the advertisement in the "Calgary Herald" on Saturday April 8th.

I recently did some work on pumps here in Ottawa. Hence for this and other reasons I am well-qualified. A copy of my letter of application and C.V. are in the mail to you.

Insufficient time was allowed for many people outside Calgary to respond, in that the advertisement appeared on April 8th whereas the deadline for replies was April 11th. Therefore, for this and other reasons detailed in my letter, which is in the mail, you will kindly see to it that I am offered a position. There are additional conditions which you must meet, which are also detailed in my letter. You know the reasons why, so do not attempt to make any trouble for me.

Yours faithfully,

ROBERT T. CHISHOLM B.Sc.Hons.(Eng.), C.Eng.(U.K.),
M.I.Mech.E.(U.K.), Jr.Eng.(Quebec).
